R2D2-7

R2D2-7

with powerful Ventilator and Compressor

The same basic design as the proven R2D2 but with a more powerful ventilator and compressor. In addition the filter area is increased by two filter cartridges to 14 m². The high performance of the R2D2-7 makes it suitable for the CONTEC® shotblasters ELGATOR® and MODUL 350/2. Applications for the CONTEC® Dust collectors include:

- Construction - to connect to planers, grinders, saws, shotblasters etc.
- Industrial plants - to remove chippings, dirt and dust
- Builders for cleaning - removing sand, rough material and to connect to various machines
- Maintenance companies - to remove litter e.g. on railways or organic material such as leaves ... and much much more !

R2D2

FILTER UNIT

THE most powerful dust collector of the CONTEC product group

The cartridge filters are automatically cleaned during operation by compressed air.

The R2D2 is built in two units for easy transportation.

The power unit includes all the electronics and components such as ventilator, motor and compressor.

- Includes filter cartridges and the dust container/s.
- Easy connection on site, simply push the two units together as one machine
- The filter unit comes in two versions

Version I - collects the dust in a wheel barrow.

Version II - collects the dust in buckets which can be lined with plastic bags.

TORNADO®

TORNADO®

CONTEC® Dust Collectors, well known in Construction and Industry

Whether fine dust or rough material, the CONTEC® dust collectors impress by their high performance and can be deployed in many different ways.

Applications for the CONTEC® TORNADO® include:

- Industrial plants - to remove chips, dirt and dust
- Construction industry - connects to planers, grinders, saws, shotblasters and any machines requiring dust-free operation
- Building contractors for cleaning
- Removing sand and rough material and to connect to machines and hand tools
- Maintenance companies - to remove litter, debris, e.g. on railways or organic material such as leaves ...
...and much much more

FLEXIBLE

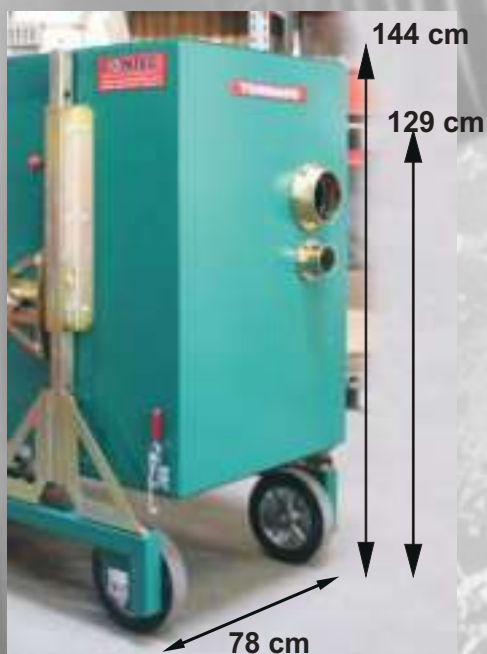

Adjustable height for transportation

HEPA FILTER OPTION

Safer dust collection for all kinds of construction applications
